

How to Install a Program (CAB file)?

Programs for Windows Mobile are normally called CAB files. Installing them is quite straightforward!

Where can I get programs from?

- [The Wingster](#) – You'll find a select number of great apps here.
- [1800PocketPC.com](#) – A large collection of apps (free and paid), with reviews and info!
- [FreewarePocketPC.net](#) – Another large collection of apps (free).
- [Handango](#) – The best paid app collection, ever!!
- [XDA-Developers](#) – One of the best forums, where developers often post their free apps.
- [Search!](#) – There are lots of other apps that you'll find, just by searching.

How to install a program through PC?

1. **Download the program.** When prompted to open or save the file, click **Save**.
2. Once downloaded, identify what the **file type** is.
 - a. If it is a **.CAB** file, then continue to *step 3*
 - b. If it is a **.EXE** file, then skip to *step 7*
3. Now, **transfer the CAB file over to your phone.** This can be done many ways:
 - Connect a USB cable from your phone to your PC, and then copy the file over to your phone through File Explorer on your PC.
 - If you have a MicroSD card, and a Card Reader in your computer, then you can insert your MicroSD into your PC, and then transfer the file through File Explorer that way too.
4. Once the CAB file is on your phone, **open the File Explorer** on your phone (*Start -> File Explorer*), and then **navigate to the location you placed the CAB file.**
5. To install it, simply **click on the CAB file!** You may be prompted for an install location:
 - a. Choose Device Memory, if you don't have a storage card, or if you want to use the application without your storage card in the phone.
 - b. Choose Storage Card, if you want to save some of your device's memory!
6. **Done!** Use your new app now! You'll find it in the Start Menu, most likely.
 - (Some games will be installed within a *Games* folder)
7. **If it is an EXE file** – Then connect your phone to your computer with ActiveSync, and run the EXE from your PC! Then it will start installing the app on your phone.

How to install a program through the phone?

1. **Download the program** from your phone, and click **Open** for the save location. It auto-installs!
2. You may be prompted for an install location:
 - a. Choose Device Memory, if you don't have a storage card, or if you want to use the application without your storage card in the phone.
 - b. Choose Storage Card, if you want to save some of your device's memory! **Done!!**
